

Steel types

Technical data sheet

- Font engraving similar to Arial (DIN 1451, medium-spaced lettering)
- Nickel-plated design
- Single or complete in type box available
- On stock available engravings: A – Z; 0 – 9; . (dot); , (comma); - (dash); / (slash)

Single steel types

Application Area

Steel types were used to mark or stamp fixed text. They can be combined in a type box or in special numbering heads. In BORRIES hand stamping tools steel types were especially used for control stamping and marking.

Steel types in a type box
